Calculation rules

Discount applies to the line-item subtotal. Tax applies to the discounted subtotal only. Shipping is not taxable. Round each discount and tax amount to two decimal places, half up.

144.00 - 14.40 = 129.60; 129.60 x 8% = 10.368, rounded to 10.37.
129.60 + 10.37 + 7.50 = **USD 147.47**.
